

Real advice isn't an app. It's a team.

The wealthy hire that team. **You can't.**

1

The Goal Planner

What matters most — and by when?

NEAR ————— FAR

- | | | |
|---|-----------------|-------|
| 1 | Emergency fund | now |
| 2 | New car | 2 yr |
| 3 | Kids' education | 15 yr |
| 4 | Retirement | 25 yr |

✓ Priorities + timelines

WHY THIS IS HARD

- People can't rank their own goals
- No real dates or amounts on them
- The same money can't cover a 2-yr and a 20-yr goal

2

The Portfolio Analyst

What you **OWN**, what you **OWE**, what **PROTECTS** you.

YOUR MONEY, IN ONE TRUTH

Own · assets	Owe · liabilities
₹42.6L	₹18.2L

Net worth **₹24.4L**

Protect · cover vs need **-₹1.2Cr gap**

Cover ₹50L Need ₹1.7Cr

✓ One net-worth + protection truth

WHY THIS IS HARD

- Money sits in 30+ different places
- Nothing shows it all in one place
- You never see your real worth — or if you're covered

3

The Cashflow Analyst

Money **in**, money **out** — what's **really** left to invest.

MONTHLY CASHFLOW · RESOLVED

Income in **₹1,85,000**

Real expenses out **₹1,32,000**

Real surplus **₹53,000**/mo

₹ real investable surplus

WHY THIS IS HARD

- 1,000s of transactions, across every bank + card
- Tracking by hand means logging every spend, every day
- So people guess their surplus — and guess high

4

The Investment Adviser

Holistic advice forms only where **all three connect**.

When goals, cashflow, and portfolio don't connect, advice stays incomplete.

80M+ salaried Indians need an adviser. Apps hand them blocks, not advice.
